

SOLID WASTE FACILITIES PERMIT

SSWMB E-2-77 (REV. 10/77)

PERMIT REVISION (OPERATION)

PAGE 1	OF 4
SOLID WASTE FACILITY PERMIT NO. 19-AR-004	
DATE	PROPOSED JUN 3 1981
	SSWMB APPROVAL JUN 26 1981
	ENFORCEMENT AGENCY APPROVAL JUL 20 1981

ENFORCEMENT AGENCY City of Los Angeles

COUNTY

Dept. Public Works/Los Angeles
County Dept. of Health Services

Los Angeles

FACILITY NAME

Bradley Avenue Sanitary Landfill East

OPERATOR

Valley Reclamation Company (Subsidiary of Conrock Corporation)

FACILITY LOCATION

9229 Tujunga Avenue, Sun Valley, CA (Peoria & Glenoaks Blvd).

FINDINGS

- A. This facility is an existing 66 acre Class II-2 sanitary landfill; site life is expected to be 2 years. The dump and cover method of operation is utilized. The facility is located at 9229 Tujunga Avenue, Sun Valley, CA. The disposal site receives 300 tons per day. The site is operated 24 hours per day, seven days per week. Salvage operations are not presently conducted. Hazardous and liquid wastes are not accepted at this facility. Types of wastes received at the site include: Residential, Commercial, Industrial and Demolition.
- B. Design and operation of this facility are as specified by the Report of Disposal Site Information dated August 2, 1977, January 19 & 23, 1978; that which pertains to the period immediately prior to August 15, 1977 is hereby made a part of this finding. Also made a part of these findings are:
- Finding of Conformance with the Los Angeles County Solid Waste Management Plan dated April 25, 1978.
 - Negative Declaration for the Project dated February 15, 1978 and associated environmental document.
 - Final site plan and partial phasing plan dated December 12, 1977 and revised May 22, 1978.
 - Letter dated January 29, 1981 requesting change of operator.

This revision is for a change of site operator from Land Restoration Corporation - Benz Disposal Company dba Bradley Sanitary Landfill P.O. Box 264 Sun Valley, California 91352 to Valley Reclamation Company, 3200 San Fernando Road, Los Angeles 90051.

There are no other proposed significant changes in design or operation of this site which was granted a change in final grade on January 2, 1979. The new operator is proposing to widen, pave and landscape the exterior access roadway to the site and complete filling of the site to the January, 1979 approved final grades.

This permit is granted solely to the operator named above, and is not transferable. Upon a change of operator, this permit is subject to revocation. Upon a significant change in design or operation from that described in this permit or in attachments thereto for the existing design and operation of a facility operating immediately prior to August 15, 1977, or from the approved intended design and operation of a facility which was not operating prior to August 15, 1977, or which herein is granted a permit modification, this permit is subject to revocation, suspension, modification or other appropriate action.

This permit does not authorize the operation of any facility contrary to the State Minimum Standards for Solid Waste Handling and Disposal. This permit cannot be considered as permission to violate existing laws, ordinances, regulations, or statutes of other government agencies.

- C. Land within 1200 feet of the site is zoned M-3 and temporary M-2.
- D. This facility's design and operation are currently in substantial compliance with State Minimum Standards as determined by physical inspection made on February 18, 1981, except that it is in non-compliance with gas migration criteria.
- E. This permit is consistent with the Facilities Element of the Los Angeles County Solid Waste Management Plan as approved December 16, 1977, and with the State Minimum Standards for Solid Waste Handling and Disposal. The facility is identified on pages 159 and 175 of CoSWMP.
- F. The following documents condition operation of this facility:
 - a. Department of Public Works, City of Los Angeles Dump Permit No. 4 dated February 18, 1981.
 - b. California Regional Water Quality Control Board, #4 L.A. Region Waste Discharge Requirements No. 58-59.

II. CONDITIONS:

A. Requirements:

1. This facility must be in compliance with the State Minimum Standards for Solid Waste Handling and Disposal.
2. This facility must be in compliance with all federal, state, and local requirements and enactments.
3. Additional information concerning the design and operation of this facility must be furnished upon request of the enforcement agency.
4. The operation shall provide portable self-contained lighting for night time operation.
5. Due to the 24 hour operation the filled area shall be covered continually, except for the active working face. The working face shall be kept as small as possible.
6. The operator shall install by July 31, 1981 a gas migration monitoring and control system approved by the enforcement agency, which can demonstrate the operators ability to control methane gas produced on site.

B. Prohibitions:

The following actions are prohibited at the facility.

1. Disposal of liquid wastes
2. Disposal of hazardous materials
3. Disposal of dead animals or infectious wastes
4. Scavenging

C. Specifications:

No significant change in design or operation from that described in Items A and B of the findings Section is allowed except for those changes which are required under "CONDITIONS" portion of this permit.

D. Provisions:

1. The operator shall immediately commence and hereafter maintain a record of total waste quantities received per day.
2. This permit is subject to review by the enforcement agency and may be suspended, revoked, or modified at any time for sufficient cause.
3. The operator will provide adequate self-contained lighting for night operations within 30 days after the issuance of the permit by the LEA.
4. The operator will provide a three (3) foot final cover of clean earth over the entire site.

E. Self-Monitoring Program:

The following items shall be monitored by the operator of this facility or his agent. Records including but not limited to these items shall be kept and reported to the enforcement agency monthly:

1. Total waste inflow ~~separated~~ into Group 2 and Group 3 categories, the number of days operating each month and a map of the area(s) in which the wastes were deposited.
2. Readings of each gas monitoring probe taken by an independent laboratory indicating the percentage of each gas within the probe; methane, CO₂ and O₂ and an explanation by the operator/owner of the measures being taken to reduce the gas readings to zero.
3. The operator shall supply in the first month of each calendar year a topographic survey of the entire site in a scale no smaller than 1" = 100'. The survey shall be taken no earlier than December of the preceding year.
4. These required items and reporting periods are subject to review and expansion by the enforcement agency.
